Prince Bidhuri

Full Stack Web Developer

Address:	**Faridabad , Haryana**
Website:	https://gteck45.cloud/
Email:	this@princebidhuri.com

Aspiring Full Stack MERN Developer with strong practical experience in building responsive, scalable web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in frontend development with React.js, Tailwind CSS, and Redux, and backend development with Node.js, Express, and MongoDB. Passionate about building user-focused features, integrating APIs (including OAuth authentication), and optimizing performance using state management. Strong foundation in JavaScript and RESTful APIs.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js (full stack framework), Redux, Tailwind CSS
Backend: Node.js, Express.js
Database: MongoDB
Tools: Postman
Other: REST API, OAuth (Google, GitHub Authentication)

PROJECTS

Link Shortener & Profile Sharing App

- Full-stack application built using Next.js for server-side rendering and performance.
- Users can shorten links, create public/private profile pages, and share them (similar to Linktree).
- Profile customization features include adding profile pictures, adding a bio, and social media links.
- Integrated OAuth authentication using Google and GitHub for secure access.
- Only signed-in users can access dashboard features and generate links
- Users can view and delete their generated links through a dedicated management panel.
- All operations and authentication are performed server-side; data is stored securely in MongoDB.

React Password Manager

GitHub

- Full-stack password manager built with React (Vite), Redux, Node.js, Express, and CRUDCRUD API.
- Implemented OAuth authentication using Google and GitHub.
- Axios used for frontend-backend communication.

Calculator Application

- Built with Next.js for basic arithmetic operations and responsive design.

Spotify Clone (Using HTML , CSS and Js)

- Frontend music player built using HTML, CSS, and JavaScript.

- Replicated Spotify UI with audio controls, responsive design, and interactive track listing.

ToDo List Application

- React app with Tailwind CSS and LocalStorage for task persistence.

- CRUD features with real-time updates and clean UI.

Weather Application

- Built with React and Next.js, integrated with WeatherAPI.com.

- Searchable forecast with detailed weather stats using Tailwind CSS.

Link Checker Tool

- Tool built using HTML/CSS/JavaScript to check accessibility of media URLs in real-time.
